Contact page					X
Reflections (description of portfolio pieces)					
Content of reflections appropriate				X	
Project images are high quality					X
Spelling and grammar are correct				X	

What was your overall first impression of the website?

The webpage had a professional appearance and was aesthetically pleasing. It was well laid out and easy for a first-time user to navigate. I enjoyed the color scheme, and the fonts were logically sized and easy to read.

Did you have any technical difficulties as you navigated through the pages and displayed the projects?

I did not experience any technical difficulties as I navigated through the main webpage or any of the linked sample pages/projects. All projects displayed as anticipated and proved easy to explore.

What do you feel are the most effective design elements of this web portfolio?

I appreciated the progression of the website as it provided a great overview of its designer, objectives, and sample work. The flow progressed logically from top to bottom, starting with an introductory section, then progressing into past projects that could be explored, and finishing with a contact information section. These aspects felt prime to inform and draw in prospective clients.

What would you suggest be changed with the design or content of this web portfolio?

My biggest suggestion for improvement of this web portfolio would be a few small changes to grammatical formatting, such as ensuring consistent capitalizations in headings and condensing language where possible. Overall, changes needed to design seem slim-to-none!
